Pharmacy Related Databases

http://libguides.nus.edu.sg/pharmacy

Medical & Pharmaceutical Related Databases

- **Embase**
  Ebase is a crucial resource for discovering biomedical evidence within published, peer-reviewed literature, in-press publications and conference abstracts. Full-text indexing of drug, disease and medical device data — supported by Emtree — helps retrieve precise answers to search queries. Especially useful for Systematic Reviews.

Science Related Databases

- **SciFinder**
  SciFinder Web enables access to references, reactions and substances databases and many of the analytical tools provided by CAS via a Web browser instead of the locally-installed client, SciFinder Scholar.

  One time registration is needed for the first-time user before you are able to access SciFinder web. Only NUS email is acceptable for registration.
