**Title**: Singapore's health care system [electronic resource] : what 50 years have achieved / editors, Lee Chien Earn, K. Satku.

**Online access via:**

| NUS Libraries | World Scientific e-Books | About this E-Resource |

**Descrip.**
1 online resource (x, 392 p.) : ill. (some col.).

**Series**
World Scientific series on Singapore's 50 years of nation-building

**Note**
Title from PDF file title page (viewed January 10, 2016).

**Summary**
"How did Singapore's health care system transform itself into one of the best in the world? It not only provides easy access, but its standards of health care, not only in curative medicine but also in prevention, are exemplary. Fifty years ago, the infant mortality rate (IMR) was 26 per thousand live births; today the IMR is 2. Life expectancy was 64 years..."

Periodontal regeneration in a buccal dehiscence model in monkeys after application of enamel matrix proteins.
L Hammarström, L Heijl, S Gestrelius - Journal of clinical ..., 1997 - europemc.org
There is increasing evidence that cells of the epithelial root sheath synthesize enamel matrix proteins and that these proteins play a fundamental role in the formation of acellular cementum, the key tissue in the development of a functional periodontium. The purpose of ...
