Search for articles from ProQuest databases

By NUS Libraries (email: askalib@nus.edu.sg)

2. Click on Databases Tab.
3. Enter ProQuest in the search box.

4. At the Databases page, select one of the first two listed ProQuest options:

5. At the ProQuest search screen, select Advanced Search. Uncheck the default Full text option.

6. Enter your search terms in the Advanced Search boxes:
   (“test tube bab**” or “in vitro fertilization” OR ivf) AND (ethic* or moral* OR relig*)
7. From the results screen, view abstract or full text as shown below:

8. As shown above, you may refine your search further by Source type, Subject, Date, etc.

9. You can output selected records from the menu.

10. Click to format selected records in your preferred style e.g. APA:
