2. ADMIN CHECKLIST

- NUSNET ID/Password

- Email
- IVLE
- Electronic resources

- Matriculation Card/PIN

- Borrow items at the library self-check machine
- Check your loan records using myLINC
- Place holds on items

Library PIN

Please note that your Library PIN is not the same as your NUSNET password (which you use to access IVLE and NUS Mail).

NUS students

By default, your PIN (Personal Identification Number) is your student SMARTCARD PIN issued by the NUS Computer Centre.

If you don't know or remember your SMARTCARD PIN, you can use the [Retrieval of Smartcard PIN service](#) which will email your PIN to your NUS email address.

Note : This is a service by the NUS Computer Centre and only works if you have not changed your default PIN before.

If this doesn't work, please approach library staff at the loans desk for a reset.

Library Portal

www.lib.nus.edu.sg

A screenshot of the NUS Libraries website. At the top, it says 'NUS Libraries > Home'. Below this are four buttons: 'FINDMORE' (orange), 'LINC' (grey), 'E-RESOURCES' (grey), and 'DATABASES' (grey). The main heading is 'FindMore@NUSL ?'. Below this is a search bar with the placeholder text 'Search library catalogue and more'. There are two checkboxes: 'Exclude Book Reviews' and 'Exclude Newspaper Articles', both of which are checked. Below the search bar is a link for 'Advanced Search >'. On the left side, under the heading 'Services For...', there is a list of user types: Undergraduates, Honours Students, Graduate Students, Academic/Executive/Professional Staff, Non-Academic Staff, and External Members. On the right side, under the heading 'I Need To...', there is a list of services: Check my library account, Renew my book, Retrieve my library PIN (which is highlighted with a red box), Pay fines/fees, Book a discussion room, and Search FAQ.

Login to myLINC

- Check your loan records
- Online Renewals
- Cancel Requests/Holds
- Modify PIN

The screenshot displays the myLINC library portal. At the top right, there are links for [Modify your PIN](#), [0 requests \(holds\)](#), [Search the Catalog](#), [Preferred Searches](#), and [My Reading History](#), along with a 'My Infogate' icon. Below these links is a 'LOG OUT' button and a user identifier 'MS'. A message box states 'No checkouts found'. On the left sidebar, there are sections for 'NUS Staff/Students' with 'LOGIN' and 'myLINC' buttons, 'Library Orientation Tours for New Students', 'FindMore Training for all Staff & Students', and buttons for 'Opening Hours' and 'News & Events'. The main content area shows a user profile for 'HELLO LOO LAY YEN' with a 'LOGOUT' button, a 'Library Intranet' link, a 'Customise my homepage' dropdown menu, and a 'myLINC (Library Record)' section listing: 0 items currently checked out, 0 request (holds), 0 ready for pickup, \$0.00 in fines, and 0 notification(s). A 'More' link is present. Below this, a login form prompts the user to enter their matric/staff/membership number (without replacement card number) and their Library PIN. A large blue arrow points from the login form area towards the top right links.

3. LITERATURE RESERACH

Resource	Data Source	Types of literatures	FAQ
3.1 ScholarBank	NUS Institutional Repository	<ul style="list-style-type: none"> •Scholarly output of NUS. •Journal articles, conference papers, patented work. •Master's (by Research) and Ph.D theses - Sep2003 to present (those which are conferred). •SDE Dissertation Space (only open to SDE students and staff) •https://lib.sde.nus.edu.sg/dspace/ 	http://scholarbank.nus.edu.sg/faq
3.2 LINC	Library INtegrated Catalogue (real time data)	<ul style="list-style-type: none"> •Acquired and subscribed contents available in NUS Libraries •Books, journals, magazines, AV materials •Print and electronic formats 	http://libfaq.nus.edu.sg/a.php?qid=6046
3.3 FindMore@NUSL	Summon™/ *NUSL <small>* Due to time-zone difference, there is a time lag of 24-48 hrs, for NUSL data to be refreshed in Summon indexes.</small>	<ul style="list-style-type: none"> •Google-like search. •Books, scholarly journals, newspaper articles, E-Books, theses and dissertations, conference proceedings, and numerous contents in academic databases indexed in Summon. •Covers content in NUS institutional repository (SB) and catalog (LINC), as well as subscribed electronic resources. 	http://libguides.nus.edu.sg/content.php?pid=333052&sid=2888588
3.4 Databases (subscribed)	Content providers / Publishers	<ul style="list-style-type: none"> •Specialised subject specific journal articles, conference papers, datasets, newspaper, reports, etc. •Full-texts •Abstracts & Indexes •Statistical data 	http://libfaq.nus.edu.sg/a.php?qid=190832 http://libguides.nus.edu.sg/content.php?pid=227106&sid=1889246
3.5 Other search tools: •Google Scholar •etc	Google Scholar	<i>•Google's search engine that covers "scholarly material" including a lot of free or open access material but may present results you have no access to.</i>	http://libfaq.nus.edu.sg/a.php?qid=158438

FindMore@NUSL vs. LINC & Databases

***FYI**
Start with the Library or
Internet?*

- LINC:
 - As of Dec 2012, FindMore@NUSL covers over 330 million records, which compares to about 1.7 million records in LINC/LINC+
- Databases:

Still FindMore@NUSL is not suitable for every task.

Firstly, while no other single search covers as much material accessible to you it still does not cover 100% of every resource or database available. So if you are doing a phd thesis where as comprehensive search as possible is desired you need to use this with other specialised databases in your discipline to cover as much ground as possible.

Secondly, while FindMore@NUSL shines in cross disciplinary research as it is not limited to any one discipline, other specialised database sources, A&I databases (abstract and indexing databases) like PubMed, EconLit, PsycInfo etc may provide a more focused search relevant to your discipline, while you might find many irrelevant results in FindMore@NUSL.

Thirdly, depending on your needs, you may find the searching features in FindMore@NUSL lacking compared to the more advanced search features available in specialised databases. For instance, many databases allow you to restrict searches by more fields and some of the abstract and indexing databases have thesaurus features that you can use to expand or restrict subject heading searches.

finding out more about Findmore@NUSL

Lim Wei Di

It's probably too early to worry about term papers but here's a piece of good news! NUS Library has recently launched FindMore@NUSL, their brand new search engine, which will make writing our term papers and lab reports a whole lot easier.

Writing a term paper is a long and labourious process involving detailed research using academic sources from all over. Do you start with books

IT PROMISES A LESS PAINFUL RESEARCH PROCESS THROUGH THE INTEGRATION OF EXISTING LIBRARY SOURCES"

available in a new library or do you start with the online journals and newspapers that NUS subscribes to? If it's the latter, which one?

Having heard enough complaints from students every semester, NUS Library was inspired to come up with FindMore@NUSL. It promises a less painful research process through the integration of existing library sources, our

institutional repository, and the online journal and newspapers that NUS subscribes to into one super search engine.

Simply put, it saves us the hassle of manually searching through ScholarBank@NUS for masters, PHD theses and dissertations written by NUS students and the other 160 million journal and newspaper articles that we have access to. It is no wonder that this was the 2nd most requested feature in the 2007 survey on the functionalities of the library catalogue.

In addition, FindMore@

"THE TEAM BEHIND FINDMORE@NUSL HAS THOUGHTFULLY CRAFTED UP REALLY USEFUL FILTERS, THROUGH ANALYZING COMMON USER BEHAVIOR AND PREFERENCES"

NUSL also boasts a search response faster than Google, a remarkable improvement from its popular precursor, InfoGate.

An obvious downside to integrating such a huge

amount of sources into one search engine is the colossal amount of search results it generates. The team behind FindMore@NUSL has thoughtfully crafted up really useful filters, through analyzing common user behavior and preferences, to help us narrow down the search results into a more manageable size. Need only peer-review journal articles? Simply check the box. Want only articles with full-text available online? Here you go.

Lastly, for the special group of middleheads who forget their sources after happily using

them, FindMore@NUSL's brand new Match Full-Text in Book function is your saviour. Instead of frantically going through all your sources again two hours before the deadline, you can simply key in the exact phrase or sentence into FindMore@NUSL and it would run a search

through its entire print and e-book collection to give you the exact source down to the page number. No more excuses for sloppy citations!

The system is not perfect yet and given the relatively new technology adopted and the

size of data involved, there are bound to be certain flaws here and there. NUS Libraries will continue to enhance FindMore@NUSL and smooth out the kinks and knots along the way. To better the service, they would love to hear more from us - because it is after all

designed for us.

Asian management style versus Western management theories - A Singapore case study in construction project management

Low Sui Pheng and Christopher H.Y. Leong. *Journal of Managerial Psychology* 16. 2 (2001): 127-141.

Abstract (summary) [Translate](#)

It is shown that the style of management in Asian countries can be explained and described using contemporary management theories from the West. This is achieved through a case study in construction project management for a typical family-run building firm in Singapore. Field observations on the construction site suggest that the style of management in Asia can be related to modern management theories from the West.

ACKNOWLEDGMENT: The contributions by Diana Choong, Chu Wee Hong, Kasim Hj Salim, Amanda Go and Jenny Koh are gratefully acknowledged. Without the kind assistance of TTPL's staff and management, this study would not have been possible.

Introduction

The financial crisis in Asia, which first started in July 1997, affected many countries in the region, including Thailand, Indonesia, Malaysia, Hong Kong, South Korea and Singapore. While the currency in Singapore remained relatively stable in relation to the US dollar, this was not the case in other countries where currencies were devalued drastically overnight. Many countries in the region were badly affected, but the government in Singapore was able to hold its ground in steering the country away from the crisis (Low and Lim, 1999). This observation suggests that the crisis in Asia may not be caused by a peculiar Asian style of management alone.

Abstract

The purpose of this paper is to present a conceptual model for the selection of architects by project managers. The model was developed from four theories: Theory of Job Performance, Theory of Contextual Performance, Network Theory of Embeddedness and Theory of the Firm. The model was tested by a postal survey of project managers who work for property developers. The principal finding is that 34 of the 40 attributes identified are important, and these were used to construct the Architect Selection Model. This paper is important because it identifies the attributes that project managers would look out for when selecting and evaluating architects.

 Newspaper Article

Abstract

'Labour costs may rise as MYE reduction may lead to fewer workers being allocated to a project . . . (resulting in) longer work hours and overtime pay in order to complete the project within the same amount of time; companies may choose to hire workers above the MYE quota and end up paying higher levies; or companies may hire more locals instead of foreigners to meet the requirements and may end up incurring higher expenses,' noted the report.\n

Construction productivity: issues encountered by contractors in Singapore

E C Lim

The construction industry in Singapore is greatly concerned about its low level of productivity. A survey of top civil-engineering and building contractors was conducted in late 1992 to identify the perceptions of top management in relation to construction productivity. The paper describes one part of the survey that related to productivity issues encountered by contractors at construction sites. Respondents were asked to rank a list of 17 problems that could affect construction productivity. The three items of greatest concern were identified as (a) difficulty in the recruitment of supervisors, (b) difficulty in the recruitment of workers, and (c) a high rate of labour turnover. The problems encountered least often included stop-work orders issued because of infringement of government regulations, and work stoppage resulting from disputes with owners/consultants. All the 87 survey returns from contractors are discussed with relevance to existing conditions in Singapore.

Keywords: construction, contractors, Singapore

The construction industry in Singapore currently contributes 6% of the country's gross domestic product (GDP) and it employs 7.5% of the total workforce. The industry has exhibited strong growth in the last few years. The GDP growth rate in the construction sector increased from 1.5% in 1989 to 21% in 1991. The 1991 figure was three times the national average GDP growth rate of 6.7% for that year. The construction contracts awarded in 1991 had a value of S\$7900M, and, in the same year, Singapore construction firms secured S\$900M worth of contracts overseas.

The GDP growth rate of the construction industry, the value of the annual contracts awarded, and the construction workforce employed, for the years 1988-91, are shown in Table 1.

The boom in construction work over the last few years is the result of a number of factors:

- an unexpectedly high demand for private residential properties, which has led to more projects being launched;
- an increase in public-sector projects, such as public-

housing schemes, roads, flyovers, and the port expansion programme;

- the push by some developers to bring their commercial projects on-stream to fuel an impending glut in the commercial property market.

The above factors make accurate projections difficult. It is even more of a challenge to gauge the industry demand and to ensure that there are sufficient professionals and workers.

In spite of the impressive performance of Singapore's construction industry over the past few years, the construction sector is perceived as a low-productivity sector, because of its low technology image and its employment of a large number of mostly unskilled foreign workers. The economic indicator used to measure construction productivity is the value added per worker. Using this indicator, the Construction Industry Development Board, Singapore, stated in a construction productivity taskforce report that construction productivity had increased at an average rate of 3.1% over the 10-year period 1982-91, which is below the 4.2% rate for the whole Singapore economy.
